EXPERIENCE AND EDUCATION IN IT

Full Stack Developer Bootcamp at Henry

Career: Full Stack Developer 06-2022 / 10-2022 - Soy Henry

PROJECTS

Individual Project - "The Food App"

- An app where you can search, filter, order, and create recipes. It has a Landing page, a Home page with pagination, a recipe detail page, and a controlled form to add your recipe.
- I developed this entire app, at the back end, server routes, Data Base with PostgreSQL, models, and used Axios to connect with the API. In the front end, I created functional components with a global store from Redux, styled them with responsive CSS, and used react-router to create routes.

Technologies: Backend: Nodejs, Sequelize, PostgreSQL, Express, Javascript, deployed with Railway,
Frontend: Javascript, HTML, CSS, React, Redux, deployed at Netlify
General: Git, Github

Links: [Youtube Demo Link](#) - [Deployment Link](#)

Final Group Project - "Moviefy +"

- On this webpage, you can add to cart/buy/book movie theater tickets, pick your sits, watch movies streaming with a subscription and create your own playlists. Also, you can search, filter, order, and movies. You will receive an email with your welcome, when you get subscribed, and with every purchase
 - I developed, at the back end, some server routes, Data Base with MongoDB, and used Axios to connect with the API, by suggesting a PromiseAll function I reduced the waiting time from 12s to 2s.
- In the front end, I created reusable functional components like the seat picker and the sliders with a global store from Redux and styled them with responsive CSS and Sass.

Technologies: Backend: Nodejs, MongoDB, Express, Javascript, deployed with Heroku,
Frontend: Javascript, HTML, CSS, Sass, Firebase, React, Redux, deployed at Netlify
General: Git, Github, Scrum, Trello
