## EXPERIENCE

### FRONT END DEVELOPER
Trabajo en Digital | May-2023 / Present | Mexico · Remote
-Developed the front end of a job board page, using technologies such as Next.js, Tailwind, and jQuery to achieve an attractive and functional user interface.
-Made significant contributions to the project's code by implementing innovative solutions and improving development efficiency.
-Guided and supported a less experienced team member, providing mentoring in critical tasks and technologies such as Next.js, Tailwind, and jQuery to accelerate their learning and foster their professional growth.
-Collaborated closely with two back-end developers, helping them understand and leverage Next.js routing flow and efficiently integrating the Tailwind style library into the project.
-Actively contributed to the front-end architecture design, participating in key decisions and offering ideas to improve usability and user experience.

### FULL-STACK DEVELOPER - FREELANCE
S.O.S. Sergio Omar Sánchez · Freelance | Dec-2022 / Apr-2023 | Córdoba, Argentina · Remote
-Successfully implemented and delivered complex web projects for clients, meeting established requirements and deadlines.
-Collaborated closely with clients to understand their needs and translate them into efficient technical solutions.
-Improved user experience and functionality of web applications by implementing modern technologies such as Next.js, MongoDB, and React.js.
-Received positive feedback from clients regarding delivered projects' quality, design, and performance.

### FULL-STACK DEVELOPER TEACHING ASSISTANT
Soy Henry -| Aug-2022 / Oct-2022 | Córdoba, Argentina · Remote
-Facilitated successful integration of students into study groups and promoted a collaborative and mutually supportive learning environment.
-Assisted students in solving exercises and encouraged the adoption of pair programming as an effective development practice.
-Received positive feedback from students and colleagues for my ability to explain complex concepts clearly and provide practical support.

HTML, CSS, Javascript, Nodejs, Reactjs, Sass, MongoDB, GIT, GitHub, Scrum, Redux, Jest, Supertest, Postgresql, Express, APIs, Nextjs, Tailwind, jQuery.
**Other Skills**
Negotiation, Problem-solving skills, Teamwork, Independent, Leadership, Team Management, Coaching.

---

# RELEVANT PROJECTS

**Individual Project - "My Fin"**
My Fin is a personal finance app with features such as tracking bank accounts, managing income and expenses, and displaying detailed graphics using React and Chart.js. It also includes a news section, bank logo display, SweetAlert2 for user feedback, a contact form using Nodemailer, and user authentication through JWT. The app aims to be user-friendly and help people manage their finances more effectively.
Technologies: Backend: Nodejs, Mongoose, MongoDB, Javascript, deployed with MongoDB Atlas,
              Frontend: Javascript, HTML, CSS, React, Redux, Nextjs, deployed at Vercel.
              General: Git, Github
              Links: Youtube Demo - Deployment

**Final Group Project - "Moviefy +"**
On this website, you can add to cart/buy/reserve movie tickets, choose your seats, watch streaming movies with a subscription, and create your own playlists. Additionally, you can search, filter, and sort movies. You will receive a welcome email when you subscribe and with each purchase.
On the back end, I developed some server routes, and a MongoDB database, and used Axios to connect to the API, suggesting a PromiseAll function that reduced the wait time from 12s to 2s.
On the front end, I created reusable functional components such as the seat selector and sliders with a global Redux store and styled them with responsive CSS and Sass.
Technologies: Backend: Nodejs, MongoDB, Express, Javascript, deployed with Heroku,
              Frontend: Javascript, HTML, CSS, Sass, Firebase, React, Redux, deployed at Netlify
              General: Git, Github, Scrum, Trello
              Links: Youtube Demo - Deployment
              Teammates LinkedIn for reference: Belén de Amorrortu - Martín Fogliacco

**OTHER PROJECTS - See more details Here**
**Individual Project - "The Food App" (Bootcamp)**
**Particular Project - "Pizza Delivery App"**
